

I think you're killing it. Very  
though provoking/engaging  
instructor and I thoroughly  
enjoy the class. Keep up  
the great work!

- I really like discussion in this class!

- sometimes I wish we wrote a few things down so it'd be easier to understand certain perspectives bc they sometimes do get confusing

Great discussion, you do a great job  
of connecting all class and really  
open his ideas. You're never negative  
keep it up.

Discussions are very interesting and you explain concepts really well. My one complaint is that we don't raise hands in discussion. It sounds childish but I don't really feel I get a chance to speak when people call out (especially because I'm really slow in the mornings).

I have no complaints whatsoever,  
you are a fantastic TA  
and I love coming to this  
discussion class because you  
can lead a great discussion!  
Thank you!

Great class. The discussions are in-depth  
and cover a broad spectrum of topics.

The discussions could be more structured. You give a lot of hypothetical scenarios + questions. However, I find it more helpful to explicitly review what the professor went over in class in order to clarify effectively. ~~Other than that critique,~~ I feel like you've done a good job.

Really like the class. Discussion section very helpful in clearing up some of the confusing parts of the lecture. Like the way the study guide prepared us for the midterm.

The class is interesting. The professor (Ron) is passionate & engaging in the subject. Very patient with students. I just wish it weren't so early. Honestly, I'd rather do this class twice a week than the big lecture.

- I like this discussion b/c it goes deeper than lecture and I actually understand the concepts.

very interesting class. I like that we  
talk about things that make you  
think outside of the box and very  
differently.  
Good teacher

The discussion section is helpful, because  
it allows us to ask questions and  
discuss them, but it also allows us  
to think of new questions and the  
material in new context

Rose has provided an open forum-type  
environment in which students are  
encouraged to speak up, ask  
questions, and truly think over  
varying topics.

I would like to see a better way of  
getting the entire class involved in the  
discussion instead of hearing the same voice  
the class otherwise is very interesting and  
engaging.

I like how the class is an open discussion and gets us thinking at 10:30 on a Monday morning. More inclusiveness from the quiet folks.

Really like sitting in the circle. The examples you give in class help me better understand what we learn in lecture and the reading.

Doing a really good job, I like how you make these classes open for discussion so that people are able to pull in their own personal beliefs.

I like that our discussions aren't boring, we relate them to real life things and are able to bring in any info we have about the subject. Very engaging.

I like ~~the~~ the way you work through questions with us, not just do it for us.

I really like how we go over problems as many as we can. Group work helps me a lot when discussed with friends.

I find problems on the board work well for me. I also enjoy the group and individual work as long as we go over the answer. I enjoy your teaching style a lot. Sometimes it is hard to get the class on time in 10 minutes though.

Really enjoy this section. You promote discussion really well and ask questions to prompt our responses and thinking instead of just giving us answers. Nothing bad to say, keep it up!

I enjoy this class more than previous recitations I have had because it is discussion based. I don't think people feel the need to participate (for a grade) but rather want to in order to voice their own ~~apin~~ opinion.

I love the way you are running this class! you make it super engaging and current which is important to me. way better than the lecture.
